

Business Vision Document - Simple Pension Scheme Setup Platform

Executive Summary

The platform will digitize pension scheme administration including employer onboarding, member enrollment, contributions, investments and benefit payments.

Business Vision Statement

Create a secure, scalable and automated pension administration platform that simplifies pension management and improves member experience.

Business Problem Statement

Current processes are manual, spreadsheet driven and lack centralized reporting and auditability.

Business Objectives

Improve operational efficiency, data accuracy, compliance, reporting and scalability.

In Scope

Scheme Management, Employer Management, Member Management, Pension Accounts, Contributions, Investments, Benefits and Reporting.

Out of Scope

Payroll processing, tax engines, banking systems and actuarial modeling.

Stakeholders

Pension Administrator, Employer, Member, Operations Team, Finance Team, Compliance Team, IT Support and Solution Architect.

Expected Benefits

Reduced manual effort, lower operational cost, improved compliance and enhanced member experience.

Future State Vision

Self-service onboarding, workflow automation, real-time visibility and centralized reporting.

Success Criteria

90% reduction in manual entry, 95% data accuracy and 99.5% availability.

Technology Vision

Angular frontend, Java 25 Spring Boot backend, MongoDB database, Docker, Kubernetes and CI/CD.

Vision Roadmap

Business Vision -> BRD -> Domain Model -> ERD -> HLD -> LLD -> Development -> Testing -> Go Live
